Projects

Academic Project: *TA Scheduler*

- Built a web app for schools to create a schedule of classes and assignments for school staff and their TAs
- Implemented a MySQL Database, creating a catalog of classes, assignments, and staff

Capstone Project: *Tool Ownership Tracker*

- An app that allows companies to keep track, logs, and reports of their tools
- Created a database through MySQL, creating a list of all job sites, tools, reports, and users
- Implemented various functions and classes, allowing for the database and application to communicate
- Designed and scaled the front-end, providing an interactive experience for both mobile and computer

Personal Project: *Portfolio Website*

- My personal Django website that would serve as my portfolio.
